FOUNDER and PRESIDENT
GEFFEN VISIONS INTERNATIONAL, INC.

Boulder, CO
1998 – current

Geffen Visions International, Inc. (GVI) is a healthcare education, research, and consulting company, specializing in integrative medicine and oncology. Its mission is to integrate advances in science, medicine, psychology, healthcare, and organizational development with the great wisdom and healing traditions of the world, and to demonstrate how these integrated models can be elegantly and meaningfully expressed in all aspects of modern life.

GVI's programs and services are based on Dr. Jeremy Geffen's pioneering integrative medicine and oncology program *The Seven Levels of Healing*[®], described in his highly-acclaimed book *The Journey Through Cancer: Healing and Transforming the Whole Person*. The program is regarded as one of the most comprehensive and coherent integrative programs available anywhere. It is based on Dr. Geffen's many years of experience as a medical oncologist, providing care and inspiration for thousands of patients and their loved ones -- combined with his extensive background exploring the world's foremost spiritual and healing traditions.

GVI works with individuals, professionals, and organizations throughout the United States and abroad. It offers a variety of lectures, seminars, retreats, consulting services, and educational and training programs, as well as books, audio programs, and other educational materials. For more information, visit www.geffenvisions.com.

DIRECTOR OF INTEGRATIVE ONCOLOGY
P4 HEALTHCARE AND CARING4CANCER.COM

Boulder, CO
2006 – 2008

P4 Healthcare, based in Ellicott City, MD, was created to align healthcare resources for better clinical outcomes by bringing together and integrating services for patients, physicians, payors, and pharma. In 2006 it launched Caring4Cancer.com, the first national patient-directed Electronic Medical Record portal for comprehensive cancer care and communications, and Caring4Cancer Magazine. The website has many thousands of visitors each month, and the quarterly magazine is distributed to more than 250,000 patients and approximately 3,500 oncologists nationwide. Dr. Geffen oversaw the development of the integrative oncology-related content for the website and magazine.

FOUNDER and EXECUTIVE DIRECTOR
GEFFEN CANCER CENTER AND RESEARCH INSTITUTE

Vero Beach, FL
1994 – 2003

The Geffen Cancer Center and Research Institute (GCCRI) was one of the first cancer centers in the United States explicitly designed to provide a working model of truly holistic, comprehensive cancer care for the 21st century. The Center was well known for its ground breaking *Seven Levels of Healing*[®] program, which integrates state-of-the-art conventional cancer treatments with a wide array of safe and effective complementary therapies, designed to promote healing and transformation at the deepest levels of the body, mind, heart, and spirit. Dr. Geffen practiced medical oncology and hematology for 11 years before closing the Center and leaving clinical practice in 2003 to work full-time with GVI. During his career as a practicing physician he provided guidance and care to thousands of patients and their loved ones. He also assembled and trained a staff of 18 dedicated professionals who were renowned for their commitment to excellence, teamwork, and meticulous, compassionate care for patients and loved ones.

Clinical and Executive Experience, continued

CHAIRMAN OF THE BOARD
GEFFEN CANCER FOUNDATION, INC.

Vero Beach, FL
1998 – 2003

The Geffen Cancer Foundation (GCF) was established in 1998, based on the generous support and encouragement of many of Dr. Geffen's grateful patients. The Foundation was the vehicle through which many integrative medicine and other supportive care services were offered free-of-charge to patients and family members throughout the Vero Beach, FL community and surrounding areas. Throughout its history, GCF also sponsored Dr. Geffen's renowned *Seven Levels of Healing*[®] program, along with a variety of other educational programs and services.

Research Experience

GEFFEN VISIONS INTERNATIONAL
and ROCKY MOUNTAIN CANCER CENTERS

Boulder, CO
August 2007 – Present

In August 2007, Rocky Mountain Cancer Centers (RMCC), in Boulder, CO, began offering Dr. Geffen's *The Seven Levels of Healing*[®] integrative oncology education and support program to anyone touched by cancer; including patients, relatives, friends, and health professionals. Specially trained RMCC staff facilitate the 7-week Program's weekly 2-hour sessions. Potential participants attend a 2-hour Introductory Session prior to enrolling, and feedback forms were collected at the end of each session and upon Program completion. In the first nine months of the project, 94 individuals participated in the Program, with outstanding feedback. Results were published in abstract in the *Journal of the Society for Integrative Oncology*, Fall 2008, entitled "The Seven Levels of Healing[®]: A Comprehensive Integrative Oncology Education and Support Program: Results of a Pilot Project" and were presented at the 5th International Conference of the Society for Integrative Oncology, Atlanta, Georgia, November 20-21, 2008. The Program has continued at RMCC-Boulder and since September 2009 has been expanded to 5 other RMCC facilities in the State of Colorado, as well as to the Kansas City Cancer Center, in Kansas City, MO and the Arizona Cancer Center, in Tucson, AZ. As of April 1, 2010, 384 individuals have participated in *The Seven Levels of Healing*[®] program at the 7 current implementation sites. Plans are underway to implement the Program at additional cancer centers in 2010.

GEFFEN VISIONS INTERNATIONAL
and KANSAS CITY CANCER CENTER

Boulder, CO
August 2007 – Present

Beginning in September, 2009, the *The Seven Levels of Healing*[®] integrative oncology education and support program has been offered at a main location of the Kansas City Cancer Center, in Kansas City, MO. As of December, 2009, 24 individuals have participated in *The Seven Levels of Healing*[®] program at the Kansas City Cancer Center.

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
Dec. 1995 – June 2006

The GCCRI Blood, Urine and Tissue Clinical Data Bank. Established in December 1995, the bank's purpose is to identify and develop protein biomarkers that can be used as indicators or predictors of tumor activity, response to treatment, histological subtype, or prognosis in the diagnosis and treatment of cancer in humans. IRB approval was granted by the Essex Institutional Review Board, Inc., Lebanon, New Jersey. Between December 1995 and October 2003 this research protocol, GCCRI Study #95-001, collected, processed, and stored frozen serum and urine specimens from patients with cancer and hematologic disorders undergoing evaluation and treatment at the Geffen Cancer Center and Research Institute. During this time 48,537 serum samples (0.5 ml each) were

collected from 1,437 patients. In addition, 757 urine samples (0.5 – 1.5 ml each) were collected from 484 patients. The samples are correlated with extensive patient clinical data, and organized in a proprietary computerized database created by Dr. Geffen and developed specifically to facilitate biomarker research. All samples and data were collected and documented under informed consent, consistent with HIPPA regulations. In June 2006, the repository was sold and transferred to OrthoClinical Diagnostics (OCD), Raritan, NJ, a division of Johnson & Johnson for protein biomarker research and development.

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
Summer 2003

Collaborated with the MD Anderson Cancer Center (University of Texas) in a study titled: “Use of the CA-125 Algorithm for the Early Detection of Ovarian Cancer in Low Risk Women, ID01-022.” The goal of this clinical research study is to evaluate the efficacy of the CA-125 blood test in the early detection of ovarian cancer in post-menopausal women. Enrolled and collected serum and clinical data from 48 women over two months (July – August 2003).

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
Spring 2003

Collaborated with Diagnostic Oncology CRO, Inc. (Seymour, CT) in a project titled: “An In Vitro Diagnostic Device Study of the Efficacy of Tumor Markers in Monitoring Patients with Colorectal Cancer.” This study was designed to test the clinical value of an in-vitro diagnostic assay. The assay is intended for the detection of circulating tumor markers in serum. It is further intended for the monitoring of patients with colorectal carcinoma. It is proposed that the results of this trial will form the basis of a submission to the Office of Device Evaluation in the Center for Devices and Radiological Health of the FDA. Provided 224 samples from 38 patients with colorectal cancer.

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
Spring 2003

Collaborated with Diagnostic Oncology CRO, Inc. (Seymour, CT) by providing serum samples for use in a clinical trial for the Beckman Coulter, Inc. (BCI) titled “Access® BR Monitor, Access CA 15-3 510(k) Clinical Trial Assistance 03-999-14.0.” The objective of this investigation was to assess analytical and clinical performance as well as to provide clinical data for serum samples required for 510(k) and global submissions of the Access CA 15-3 Assay. Provided 101 samples from 58 patients with breast cancer.

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
2001- 2002

Collaborated with Diagnostic Oncology CRO, Inc. (Seymour, CT) and Fujirebio Diagnostics, Inc. (Malverne, PA) in a CA 19-9 Pancreatic Cancer Tumor Marker Study entitled: “A Proposal to Determine the Efficacy of the Fujirebio Diagnostics, Inc., CA 19-9 Assay as an Aid in Monitoring of Patients with Pancreatic Cancer”. Provided 128 serum samples and clinical data for this study from a total of 18 patients with pancreas cancer treated at the Geffen Cancer Center between 1996 and 2002.

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
1998 - 2001

Amgen Protocol Number 980182: "A Prospective, Non-Randomized, Open-Label, Consecutive Patient Study Using a Predictive Risk Model to Assess the Impact of Filgrastim (G-CSF) on Febrile Neutropenia and Chemotherapy Dose Intensity in the Treatment of Stage I-III Breast Cancer Patients Receiving Adjuvant Chemotherapy." GCCRI was one of only four study centers in the State of Florida selected for involvement in this research protocol. A total of 13 women with breast cancer treated at the Geffen Cancer Center were enrolled and completed the study.

GEFFEN CANCER CENTER
and RESEARCH INSTITUTE

Vero Beach, FL
1998

Collaborated with Diagnostic Oncology CRO, Inc. (Seymour, CT) in a CA-125 Ovarian Cancer Study entitled: "A Proposal to Determine the Efficacy of the Tosoh Medics, Inc. AIA-Pack CA-125 Assay for the Evaluation of Women with Ovarian Cancer After Primary Treatment." Enrolled 64 patients in five-month period (June - October 1998).

CANCER RESEARCH INSTITUTE
UNIVERSITY OF CALIFORNIA AT SAN FRANCISCO

San Francisco, CA
1990 - 1992

Evaluation of human tumor metabolism and response to chemotherapy utilizing in vivo ³¹P Magnetic Resonance Spectroscopy. Studies focused on defining the changes observed in the phosphorous spectra of primary and secondary hepatic malignancies before and after treatment with chemotherapy, and development of methods for molar quantitation of phosphorous metabolites in hepatic tumors using MR Spectroscopic Imaging. Research was funded by awards from the National Cancer Institute, and by the Cancer Research Coordinating Committee, University of California.

CANCER RESEARCH INSTITUTE
UNIVERSITY OF CALIFORNIA AT SAN FRANCISCO

San Francisco, CA
1990 - 1992

Coordinated multi-center Phase II trial of Etoposide, Leucovorin, and Fluorouracil (ELF) in patients with advanced gastric cancer. Participating institutions included UCSF Medical Center, San Francisco General Hospital, San Francisco VA Medical Center, and the private practices of several San Francisco oncologists. Results reported in Proceedings of ASCO, March 1992.

HOSPITAL OF TRADITIONAL TIBETAN MEDICINE, and
THE TIBETAN MEDICINE INSTITUTE

Tibet and India
Summer 1988

Conducted research on the history, philosophy, and practice of Tibetan medicine as a visiting physician at the Hospital of Traditional Tibetan Medicine in Lhasa, Tibet, and at the Tibetan Medicine Institute, in Dharamsala, India. While in Tibet, also negotiated successfully with the Tibetan government as a representative of the Boulder-Lhasa Sister City Project (a member of Sister Cities International), to build a joint Western/Tibetan Medicine clinic in Lhasa, Tibet.

DEPARTMENT OF MICROBIOLOGY
NEW YORK UNIVERSITY MEDICAL CENTER

New York, NY
1983 - 1986

Conducted the first clinical trials of high dose intralesional administration of human leukocyte (alpha) Interferon in patients with Condylomata acuminata. Then designed and initiated a randomized, double-blind, placebo-controlled follow-up study which confirmed the therapeutic efficacy of intralesional alpha-Interferon as a treatment for this disease. This work formulated the basis for my Honors Research Thesis, and subsequently led to FDA approval of alpha-Interferon as a treatment for Condylomata acuminata.

THE RITA AND STANLEY H. KAPLAN CANCER CENTER
NEW YORK UNIVERSITY MEDICAL CENTER

New York, NY
Fall 1984

Data manager for a Phase III study of the efficacy and toxicity of mitoxantrone compared to adriamycin in the chemotherapy regimens CMF (cyclophosphamide-mitoxantrone-5-fluorouracil) versus CAF (cyclophosphamide-adriamycin-5-fluorouracil) for patients with advanced breast cancer.

WOODLANDS INSTITUTE AND JOHNS HOPKINS UNIVERSITY
MEDICAL EXPEDITION TO NEPAL

Nepal
Summer 1984

Conducted an independent research study of the indigenous forms of medical practice in the Himalayas of Nepal. As a member of the medical expedition team, also participated in a six-week public health survey of several villages between Kathmandu and the Nepal's Langtang Valley, near the border of Tibet.
